

# Template Week 7 – Host your website on GitHub

Student number: 569073

Domain name (URL) of your website on GitHub:

<https://jasper569073.github.io/>

Relevant screenshots + motivation:

The screenshot shows the GitHub Pages settings for the repository `jasper569073.github.io`. The main heading is "GitHub Pages". Below it, a message says "Your site is live at <https://jasper569073.github.io/>". There are two main build options: "GitHub Pages Jekyll" (selected) and "Static HTML". Both options have a "Configure" button. The "Build and deployment" section also includes a note about workflow details and deployment history. At the bottom, there's a "Custom domain" section.

The screenshot shows the GitHub repository page for `jasper569073.github.io`. The top navigation bar shows the repository name and a "Public" status. The main area displays a list of files: `main`, `1 Branch`, `0 Tags`, `css`, `images`, `pdf`, `home.html`, `index.html`, `week1.html`, `week2.html`, `week3.html`, `week4.html`, `week5.html`, `week6.html`, `week7.html`, and `README`. On the right side, there are sections for "About", "Activity", "Releases", "Packages", and "Deployments". The "About" section includes a "website it fundamentals" link. The "Activity" section shows 0 stars, 0 watching, and 0 forks. The "Releases" section indicates no releases published. The "Packages" section shows no packages published. The "Deployments" section shows one deployment by "github-pages" 1 minute ago.

Hello im Jasper I like magic the gathering
